Good afternoon Jane,

Sorry for the delay in contacting you ahead of tomorrows meeting regarding the timber transport.

I include the photos requested from Tuesday when a forestry low loader was retiring from Bowness Knot (with escort vehicle immediately in front) caused a traffic jam which subsequently led to a forestry flatbed reversing into our garden wall.

The low loader cleared our property by only a matter of inches, I'm sure you can appreciate how worrying this is. One slight misjudgement from the driver is all it would take to cause structural damage to our property.

If you can zoom in you can see the escort vehicle has had to drive onto Black Pots front garden to try to allow the vehicles to pass.

What you can't see is the queue of traffic building down by our property.

The timing of the timber lorries has clashed with the secondary school children leaving the valley and in the case of my daughter made her late for the bus on Tuesday. Thankfully on Tuesday the bus was running late otherwise we would have had to drive her to school in Keswick.

Thank you for your time

Kind regards

Gill Greggain
