

NOTICE UNDER REGULATION 15 OF THE OFFICIAL CONTROLS (PLANT HEALTH AND GENETICALLY MODIFIED ORGANISMS) (ENGLAND) REGULATIONS 2019 ("THE 2019 REGULATIONS") PRESCRIBING MEASURES TO PREVENT THE SPREAD OF *Phytophthora ramorum*

Section 1 – Declaration

An inspector (authorised by the Forestry Commissioners for the purpose of the 2019 Regulations) has inspected the location described in Section 3 of this Notice and found or suspected the presence of *Phytophthora ramorum*.

Phytophthora ramorum is a controlled plant pest for the purposes of the 2019 Regulations, which is not normally present in Great Britain and in respect of which there is danger of its spreading or being spread in Great Britain.

Under the powers conferred by regulation 15 of the 2019 Regulations the measures set out in Section 4 of this Notice are required to be taken by you, being the person named in Section 2 of this Notice as the occupier or other person in charge of the premises on which *Phytophthora ramorum* is known or suspected to be present.

Under the powers conferred by regulation 15 of the 2019 Regulations, I further require you to inform your local Forestry Commission Inspector not later than **30th September 2022** whether the measures required in Section 4 have been complied with and to provide details of the steps taken in order to comply with them.

If you want advice on how to comply with this Notice, if you know or believe that any of the information given in sections 2 and 3 is wrong, or if you have any questions about plant health controls generally, you should contact your local Forestry Commission Inspector in the first instance (contact details below).

Signed:

Name: Becky Brown

Date: 4th March 2022

(An inspector authorised by the Forestry Commissioners to be an inspector for the purposes of the 2019 regulations)

Date of Expiry: 30th September 2025

Compliance Date: 30th September 2022

Your FC contact: Peter Fox

Address: Forestry Commission, Ghyll Mount, Gillan Way, Penrith 40 Business Park, Penrith, Cumbria, CA11 9BP

Telephone: 03000674189 /07768142942 **E-mail:** peter.fox@forestrycommission.gov.uk

Section 2 – Professional operator, occupier or other person in charge of the premises on which *Phytophthora ramorum* is known or suspected to be present

Name: Daniel Young

Address: The Swallows, Longmoor Head, Cleator, CA23 3AG

Telephone:

Section 3 – Location and nature of the material on which *Phytophthora ramorum* is known or suspected to be present

Location of Infected Material:

Area within the "Statutory Notice Extent" marked on the map shown at Annex 1 of this Notice.

Ennerdale Parish Council NY 132 143 (FC site reference 5029)

Nature of infection:

The presence of *Phytophthora ramorum* is suspected or confirmed on the following species:

- **Japanese larch** (*Larix kaempferi*)
-
-

Section 4 - Measures to be taken

The infection described in Section 3 must be contained and destroyed using the specifications in Parts 1 and 2 below.

Part 1: Containment. The following measures will apply until **30th September 2025** (the Date of Expiry defined in Section 1), unless this Notice is amended or revoked by an Inspector.

1) No plants, or parts thereof, of any susceptible genera and species, shall be removed from the "Statutory Notice Extent", as defined by the red outline on the map at Annex 1, without the written authority of an Inspector. This includes material derived from plants and trees felled in the red hatched "Treatment Area" (see map at Annex 1). Known susceptible genera are listed at Annex 2. Authorisation to remove such material from the "Statutory Notice Extent", or to process such material within the "Statutory Notice Extent", may be obtained from the Forestry Commission (Telephone: 0300 067 5155 or e-mail: plant.health@forestrycommission.gov.uk).

Part 2: Destruction: The following measures must be completed by **30th September 2022** (the Compliance Date defined in Section 1), unless otherwise stated.

Specification:

2)

All larch (*Larix* species) present within the red hatched "Treatment Area", as defined on the map at Annex 1, is to be felled and the branches removed from the stems. Any regeneration of larch developing after the Compliance Date must be cut or killed by chemical treatment (glyphosate 360g/l product in accordance with the manufacturer's label recommendations, at a minimum rate of 5 litres per hectare), to ensure that no living larch material remains by the Date of Expiry.

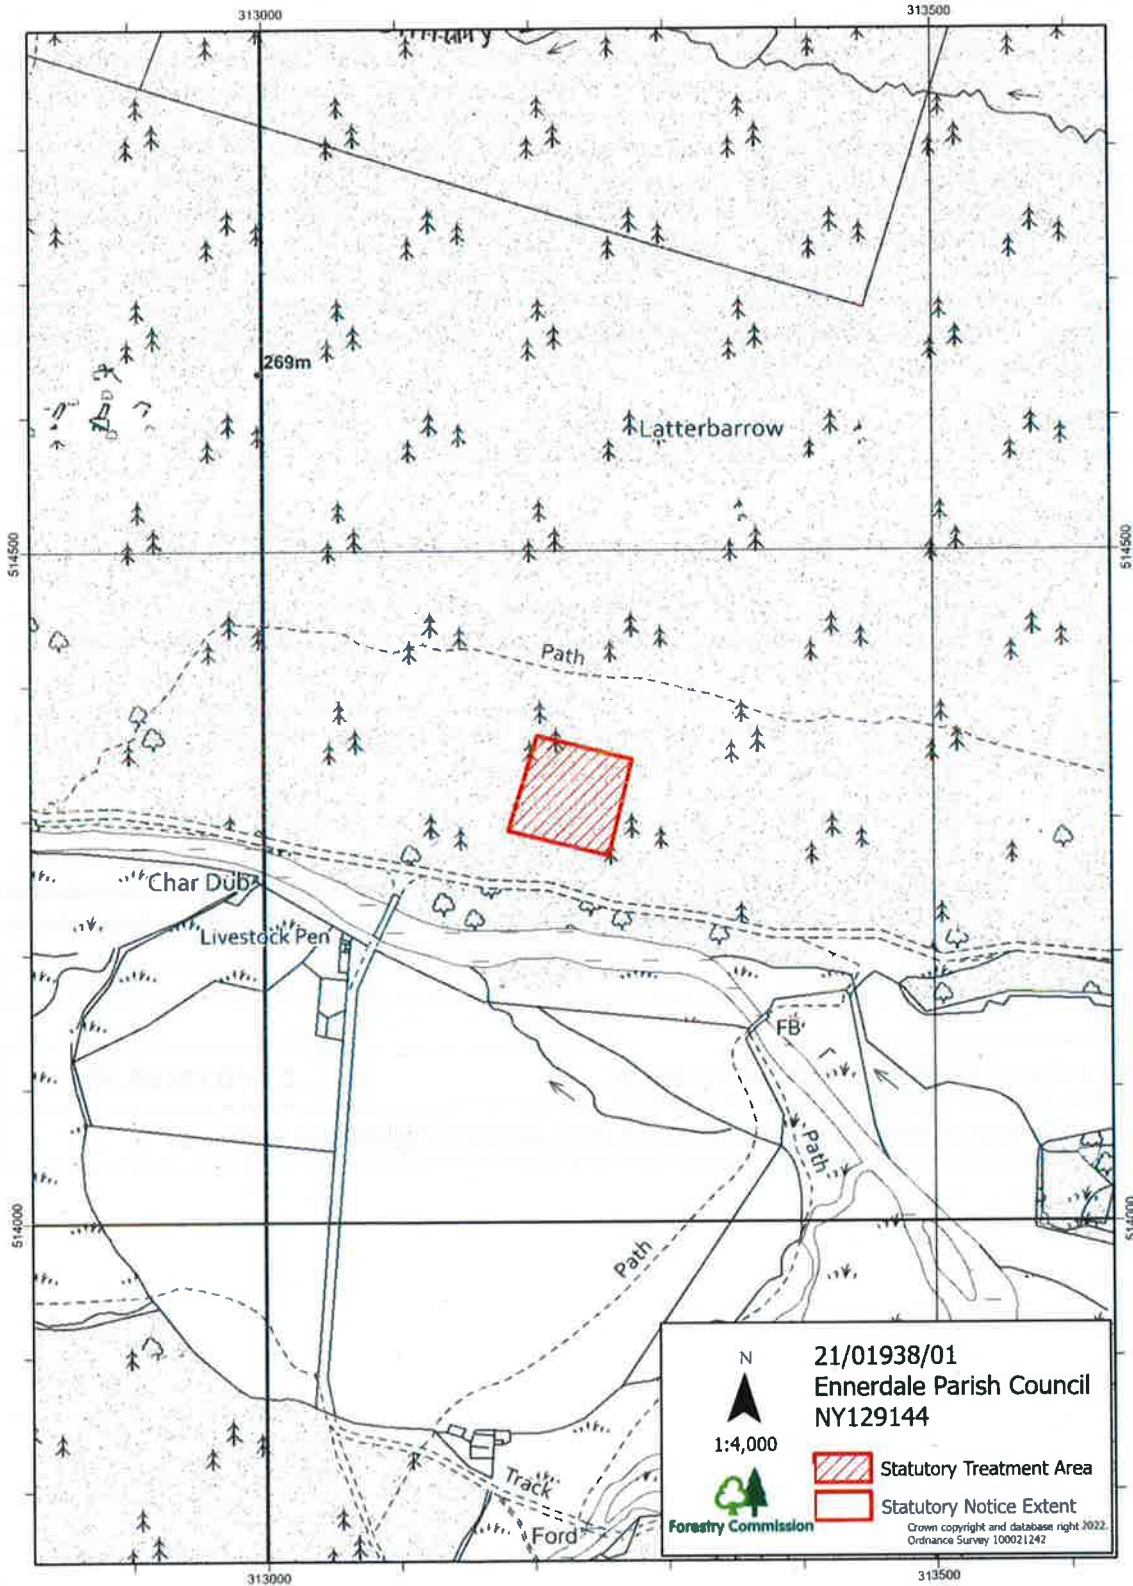

3) All work undertaken to achieve the requirements of this Notice should comply with industry best practice as detailed in the FISA/HSE guides and meet all current environmental legislation relevant to the premises in Section 3. Where burning is to take place the current regulations and exemptions associated with these operations must be observed.
